DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gary Cummings (847) 862-0270 on 19 October 2006.

Cancel claims 12 and 19.

Amend claims 1, 9 and 14 as follows:

1. (Currently amended) In a vehicle comprising a first device and a second device, an active network communicatively coupling the first and second data devices, the active network including a plurality of active network elements coupled by connection media, the plurality of active network elements and connection media being configured to provide a plurality of communication paths between the first device and the second device for a communication between the first device and the second device; wherein one of the plurality of active network elements comprises a root node element, and wherein the active network is configured relative to the root node element.

9. (Currently amended) The vehicle of claim 8, wherein the interface comprises a wireless interface.

14. (Currently amended) Within a motor vehicle, an active network for communicating data between a first device and a second device within the motor vehicle, the active network comprising:

a data interface to each of the first device and the second device for coupling the first device and the second device, respectively, to the active network, wherein the data interface operates to accept data from or deliver data to the device, respectively, independently of the functionality of the respective device;

a plurality of active network elements coupled by connection media;

the interfaces being coupled to at least one of the active network elements; and wherein the active network elements are configured to define a plurality of communication paths between the first device and the second device for a communication between the first device and the second device;

wherein one of the plurality of active network elements comprises a root node element, and wherein the active network is configured relative to the root node element.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1 and 14 are allowed.

The prior art discloses a vehicle comprising a first device and a second device, an active network communicatively coupling the first and second data devices, and plurality of active network elements and connection media being configurable to provide a plurality of communication paths between the first device and the second device for a communication between the first device and the second device.

The prior art however fails to disclose or suggest wherein one of the plurality of active network elements comprises a root node element, and wherein the active network is configured relative to the root node element.
